# Baptiste Jonglez
Inria Grenoble

- Research Engineer in **Grid'5000 team**

- Previously: PhD in **networking**

- Research interests: transport protocols, performance, routing, testbeds

Current work: network automation

- Rework **kavlan** feature of Grid'5000

- Goal: allow **dynamic** provisioning of all network resources and services: VLAN, IP addresses, DHCP, DNS, routing, VPN connectivity

- Based on Neutron (from Openstack)

- Work-in-progress, discussion welcome!
